Описание VirTwIC is a small Twitter client that uses the Twitter API. You can sign in to your account, view your home timeline tweets, update profile informations, post new tweet, automatic timeline refresh. VirTwIC on Facebook: ===== VirTwIC is a small Twitter client that uses the Twitter API. You can sign in to your account, view your home timeline tweets, update profile informations, post new tweet, automatic timeline refresh. Проблемы Установить VirTwIC is a small Twitter client that uses the Twitter API. You can sign in to your account, view your home timeline tweets, update profile informations, post new tweet, automatic timeline refresh. Features ===== You can select your home timeline to be displayed when you start the application. It's possible to select a different layout for timeline or for tweet details if a tweet is selected. To keep them safe, they are shown as protected by Twitter, so you can't move them to your timeline. You can select your home timeline to be displayed when you start the application. It's possible to select a different layout for timeline or for tweet details if a tweet is selected. To keep them safe, they are shown as protected by Twitter, so you can't move them to your timeline. Home timeline and tweet details layout can be saved for each home timeline and profile, so you won't need to set this parameter for the second time. The number of tweets in your home timeline and the number of users in your timeline are automatically taken from the twitter API. There are two options available for updates. The first one (Automatic) refresh the timeline with the most recent tweets. This option is much faster but with less detail, though. The second option (Every X seconds) refresh the timeline after a random time.

What's New In VirTwic?

Twitter Client for Windows: VirTwic is a small Twitter client that uses the Twitter API. You can sign in to your account, view your home timeline tweets, update profile informations, post new tweet, automatic timeline refresh. Read more VirTwic News: 2 new features coming in VirTwic 0.4.4 include support for creating new groups using the #create-group syntax and a change to the handling of the profile_image parameter. This allows the client to work better with Gravatar images. Also in this release, errors on the user_id parameter are now handled more gracefully. VirTwic Review: VirTwic was my main client for quite some time. It has a clean UI, a lot of features, supports multiple accounts, and have nice widgets and theme options. A lot of options, an easy to use and a cute interface. VirTwic is my no.1 twitter client ever, I recommend it to all of you! VirTwic Screenshots: AdCleaner is a powerful browser extension to help you in your daily internet life. No more unwanted banners, no more popup ads, no more spam and malware. AdCleaner lets you selectively choose the ads you see and how much time you want to see them. AdCleaner Description: Ads are a fact of life on the Internet. But they can be distracting and an annoyance to website visitors. The ads most of us see are not necessarily the ones a visitor wants to see. AdCleaner is a browser extension that lets you selectively control the ads that you see, based on your selection of your criteria. You can choose to ignore advertisements that contain bad content. You can choose to ignore advertisements on a specific website. You can choose to only keep advertising on a specific website you like. And AdCleaner allows you to keep ads on the websites you visit for an adjustable period of time. You can even keep ads on a website for an entire hour, without interruption. The possibilities with AdCleaner are practically limitless. You can even set up a schedule that will allow you to get messages or email alerts for a selected site(s). AdCleaner News: AdCleaner 0.6.0 is released! This version includes a new feature to block webads. Now you can choose to never show internet advertising on your computer. With this feature, you can be sure that no annoying advertisements spoil
